

# Why Choose Abodo's Vulcan® Screening

Crafted from FSC® certified, rapidly renewable plantation timber and heat tempered for durability, Vulcan Screening offers the timeless beauty of timbers from old growth, ancient forests with none of the environmental cost.

New Growth Feature Timbers

## Carbon Storing

Verified to store more carbon than is used in its production, Vulcan Screening is Environmental Product Declaration (EPD) and Declare certified.

## Patented Performance

Heat tempered and precision engineered with Abodo's patented vertical grain technology for enhanced stability and a timeless aesthetic.

## Global Gold Standard Forestry Sources

Responsible sourcing from rapidly renewable, FSC® certified New Zealand plantation forests – to protect irreplaceable ancient forests.

## Natural Beauty

Honouring the essence of timber, Vulcan Screening brings texture and warmth to connect every project to nature.

ABODO

○ Vulcan Cladding and Screening in Protector – Nero

✓  
**PROVEN  
DURABILITY**

✓  
**ENHANCED  
STABILITY**

✓  
**FSC®  
CERTIFIED**

✓  
**EPD  
CERTIFIED**

✓  
**DECLARE  
CERTIFIED**

✓  
**25 YEAR  
WARRANTY**

○ **Enhanced Stability + Long Lengths**

Using only heat and steam, our unique heat tempering process provides 98% dimensional stability. This allows for extended lengths and greater spans, without the risk of movement.

○ **Proven Durability**

Vulcan Screening is extremely durable and comes with a 25 year warranty for exterior feature applications.

○ **Reduced Leaching**

Heat tempering (also known as thermal modification) extracts most tannins and resins, so greatly reduces the chances of leaching or unsightly staining.

○ **Lightweight**

Vulcan is light, straight and easy to work with, providing an exceptional level of detail for a high quality finish.

○ **Lower Maintenance**

Enhanced dimensional stability improves coating performance and longevity. Vulcan accepts a wide range of stains and oils, including Abodo's custom designed Protector coating.

○ **Built for the Elements**

Our thermal modification process and engineered vertical grain orientation mean that Vulcan withstands extreme temperatures and harsh coastal conditions, while also weathering consistently over time.
